ADAMAS

REGULATORY TECHNOLOGY PRACTICE

Can you demonstrate that your AI and digital systems are inspection ready?

Technology Innovation. Regulatory Confidence.

ADAMAS Consulting is your trusted regulatory partner for innovating safely and staying inspection ready. As AI and digital technologies become increasingly embedded in regulated environments, the need for effective oversight, governance and assurance has never been greater. We give you independent assurance that your systems, and the vendors behind them, meet regulatory expectations and are prepared for inspection.

Innovative technology rarely arrives as a decision. It comes in through a platform upgrade, a CRO efficiency programme or a vendor roadmap. **Are you ready for the responsibility?**

SEE IT

"Where am I exposed?"

An independent view of where AI and digital systems sit in your organization, and what that means for inspection.

FIX IT

"What controls do I need?"

Proportionate governance and controls, built around the risk you actually carry. We show you how, or fix it with you.

DEFEND IT

"Is it inspection-ready?"

Evidence and preparation, so you can show a clear picture of your own systems and your suppliers'.

WHAT WE DELIVER

AI Governance & Assurance

Assess, govern and manage the risks associated with AI use in regulated environments. Typically starts with an AI readiness assessment, then governance framework and supplier assurance.

Digital Transformation Assurance

Independent regulatory and quality expertise during technology-enabled change, from strategy and supplier selection to implementation assurance and operational readiness.

Digital Compliance

Assess and strengthen your overall digital compliance environment, with a health check and targeted remediation.

Inspection Readiness

Show that your control environment is ready: readiness assessment, mock inspection, remediation and inspection support.

WHY ADAMAS?

Inspection Authority

Thousands of GxP audits across 100+ countries. Specialist in-house expertise in AI, digital technologies and GxP compliance.

End-to-End Technology Assurance

Independent assurance of your internal systems and external technology providers, enabling comprehensive oversight of GxP compliance risks.

Independence

We do not build, implement or sell technology. We deliver independent GxP Quality Assurance, backed by deep regulatory expertise, giving you objective expert advice you can rely on.
